

DELSORBO FAMILY

DAYTON, OH, USA

GFPD WARRIOR: ANA

- Anastacia (Ana) is 42 years old.
- Ana was diagnosed at 13 months with a peroxisomal biogenesis disorder in the Zellweger spectrum (PBD-ZSD).
- PEX 1

GFPD WARRIOR: CHRISTOPHER

- Christopher died at the age of 4 months and 16 days.
- He died before formal diagnosis (1980) and Dr. Hugo Moser reviewed his medical records and assured us he also had ZSD.

Our biggest fans/supporters are Anne, Ana's Godmother, and her daughters, Erin, Tara (one of Ana's trained caregivers), Catherine (Ana's BFF), and Lisha (Ana's Direct Support Professional for 20 years) and lots of friends and family members.

OUR FAMILY INCLUDES

Tony (dad) Patty (mom) and
Anthony (brother)
We are a retired Air Force Family,
originally from Schenectady NY,
and we transferred to Wright-
Patterson AFB in Ohio and stayed.

Our favorite thing
about Ana
is her smile.

SYMPTOMS EXPERIENCED

- Feeding difficulties
- Low muscle tone
- Vision Loss
- Seizures
- Balance problems
- Reflux
- Abnormal liver function
- Dental symptoms
- Hearing loss
- Kidney symptoms
- Leukodystrophy

FUN FACT: Ana loves the casino and playing slot machines.

- Special Education Teacher

ADVICE FOR PROFESSIONALS

Reach out to the foundation and researchers.

SIBLING

- Anthony, 38, is Ana and Christopher's younger brother, and he has been Ana's protector and cheerleader all his life.
- He was one of the first pregnancies to be tested for ZSD via prenatal testing, chorionic villus sampling, during the FDA trial.
- He did his 6th grade science project on ZSD.

SYMPTOMS EXPERIENCED

- Rotary nystagmus
- Enlarged fontanelle
- Bleeding issues

Our favorite thing about Christopher was his smile. He was sweet and precious.

The GFPD has helped our family by connecting us with other families.
